The PLUS+1™ Control Platform

Productivity and Performance
The OEM design environment continues to become more challenging, every day, every year. Vehicle design teams are expected to accomplish more with fewer resources, while meeting the demands of tighter emission and safety regulations.

Sauer-Danfoss has a powerful, proven solution for today’s challenges: PLUS+1™, a complete development environment for machine control solutions. With PLUS+1 technology, a growing portfolio of PLUS+1 Compliant products, and software platform PLUS+1 GUIDE, our customers are able to rapidly develop and customize electronic machine control. PLUS+1 provides a new level of freedom for design engineers, all while reducing coding time and testing.

The PLUS+1 Advantage: Bring Better Machines to Market Faster

With the PLUS+1 platform, you can quickly build customized applications from the Sauer-Danfoss library of software control components, and reduce the cost and development time normally associated with programming.

PLUS+1’s modular design of hardware and software allows developers to effectively construct a solution that easily scales to the machine’s control requirements. Developers use this flexibility to add value and machine differentiating features at the level of complexity that fits the design challenge.
45 Years of Experience at Your Disposal
The PLUS+1™ Control Platform offers more than just today’s cutting edge technology for mobile machine control – with PLUS+1 comes decades of collective vehicle application experience. Our proud history is firmly rooted in hydraulics and fluid power, coupled with vast and ever-evolving know-how in electronics, steering components, and spool valves. Sauer-Danfoss brings all of this knowledge into PLUS+1.

Your Strongest Partner in Machine Control Design
At Sauer-Danfoss, our whole team supports your machine: from software engineers to system specialists and vehicle application experts. Taking a truly integrated systems approach has helped Sauer-Danfoss become known for exceptionally strong customer and system support around the globe.

We make it our business to have an in-depth understanding of system functionality, application requirements, and market demands in different parts of the world. We want to know your machinery needs and to serve them better than anyone else.

OEMs can use this world-class operational core and knowledge as a foundation for their next generation of mobile off-highway vehicles. Even better, users can build on this foundation with their own creativity to further differentiate vehicle systems.
Sauer-Danfoss’ broad portfolio of PLUS+1 microcontrollers are the ‘central command’ of any PLUS+1 system, and we develop them with robustness and flexibility in mind. Our microcontrollers offer many software-configurable hardware features making it easy to match the input and output requirements of your application. Some modules even include high-output current capabilities for other electrical system elements, such as lighting, small DC electric motors, and high-current solenoids.

Our powerful PLUS+1 microcontrollers are equally suited to bring intelligence to every node of a distributed control system, or act as a stand alone control solution for applications that are smaller in scope. And thanks to their rugged design, they’ll withstand the toughest conditions your vehicle can encounter. PLUS+1 controllers combine state-of-the-art electronics and robust packaging to ensure your solution delivers high performance with reliability you can trust.

**Features & Benefits:**

- High-speed DSP (Digital Signal Processor) technology to process even the most complex applications
- Stackable microcontrollers for high mounting flexibility
- CAN-based communications for state-of-the-art control performance
- 8 I/O configurations (14 include I/O modules) for multiple control options – the building blocks for almost every function

---

## PLUS+1 Input/Output (I/O) Modules

Designed to extend the functionality of our PLUS+1 microcontrollers, our I/O modules can be configured to match your exact input and output requirements, and are used as the building blocks for almost any control function. These stackable microcontroller add-ons integrate new control functions smoothly and effectively.

Scalable Software Solutions at Your Fingertips

**GUIDE - Graphical User Integrated Development Environment**

**Benefits of GUIDE include:**
- Graphical development environment for easy to understand coding
- Flexible design environment
- Simplified code reuse for decreased time to market
- Quickly create custom solutions
- Complete integration with PLUS+1 Compliant products
- Application blocks backed by years of experience
- User friendly PC-based service tool

Time-to-market is crucial in the mobile machinery industry, and PLUS+1 GUIDE™ provides a powerful, proven software framework to quickly build – and customize – complete electrohydraulic sub-system and vehicle control solutions. With GUIDE, you can easily and efficiently integrate control, work and propel functions for superior mobile machinery control.

GUIDE provides a graphical-based approach to programming PLUS+1 devices. Its drag-and-drop platform reduces the cost and development time normally associated with programming. GUIDE also includes system diagnostic tools, downloading utilities and customizable service interfaces. With GUIDE you’ll have the power to create well differentiated, custom solutions to help you bring better machines to market faster.

**Maximize Machine Performance**

It’s your choice. With GUIDE, you can choose the appropriate level of software based on the functionality and development complexity you desire. GUIDE is an ever-expanding set of building blocks that allows you to choose everything from basic components to operation-ready solutions. All of these are expertly designed to help you maximize machine performance.

Using GUIDE, control system developers draw from a hierarchy of pre-tested software blocks or modules that can be reliably integrated at all levels. Once you select an application block, it can be immediately compiled and downloaded to the controller – if it’s a perfect fit to vehicle requirements. Or, it can be tailored to specific vehicle requirements by reprogramming within the GUIDE environment.

PLUS+1™ Compliance Brings it all Together

PLUS+1 Compliance ties our advanced mobile control technology together – ensuring all our electrohydraulic products integrate seamlessly in the customized control system developed using PLUS+1 GUIDE.

Using PLUS+1 Compliant products within the GUIDE programming environment means that you can develop customized controls faster than ever before. You can be certain a product with the PLUS+1 Compliant Icon has been tested with other PLUS+1 Compliant products and GUIDE Compliance Block software modules, assuring optimum performance and seamless integration.

A Comprehensive PLUS+1 Product Portfolio

Sauer-Danfoss has taken even more guesswork out of your design process by creating an extensive line of PLUS+1 Compliant products. Together with the GUIDE development platform, Compliant products are developed with design engineers in mind. Development and testing time is reduced, all while maximizing machine performance.

With PLUS+1 Compliant components, you can be confident in the design system validation process - and bring your machines to market faster.

Look for the PLUS+1 Compliant Icon on all Your System Components

– Better Machines to Market Faster
Sauer-Danfoss is a global manufacturer and supplier of high-quality hydraulic and electronic components. We specialize in providing state-of-the-art technology and solutions that excel in the harsh operating conditions of the mobile off-highway market. Building on our extensive applications expertise, we work closely with our customers to ensure exceptional performance for a broad range of off-highway vehicles. We help OEMs around the world speed up system development, reduce costs and bring vehicles to market faster. Sauer-Danfoss – Your Strongest Partner in Mobile Hydraulics.

Products we offer:

- Bent Axis Motors
- Closed Circuit Axial Piston Pumps and Motors
- Displays
- Electrohydraulic Power Steering
- Electrohydraulics
- Hydraulic Power Steering
- Integrated Systems
- Joysticks and Control Handles
- Microcontrollers and Software
- Open Circuit Axial Piston Pumps
- Orbital Motors
- PLUS+1™ GUIDE
- Proportional Valves
- Sensors
- Steering
- Transit Mixer Drives

Wherever off-highway vehicles are at work, so is Sauer-Danfoss. We offer expert worldwide support for our customers, ensuring the best possible solutions for outstanding performance. And with an extensive network of Global Service Partners, we also provide comprehensive global service for all of our components.
